NATIONAL OFFICE CORRESPONDENCE

01 January 2023

EUSA New Year's Message

EUSA wishes all teachers a happy and a prosperous new year. We have noted with appreciation teachers' efforts to uplift the nation under dire & difficult circumstances in 2022. Many teachers were not supported by DBE and provincial DoE offices. The lack of safety in our schools exposed many teachers to danger with some losing their lives. Unruly learners contributed greatly in the assault and death of our dear teachers. This should be squarely be blamed on the abolished corporal measure and failure of SGBs in many instances. However, teachers pulled through for the nation and EUSA thank you all deservedly so for this patriotic gesture.

In the last quarter of 2022, our offices were flooded by requests from students of different universities, calling for a EUSA student wing to be established. Many are those in the faculty of Education and those that are unemployed graduates. They gave a number of reasons based on the difficulty and abusive conditions they face while studying at these universities.

For the first time ever, EUSA will have a **STUDENT WING** in all universities that will represent the interest of student members and to protect them against any abuse or ill-treatment while studying.

To join the fast-growing teachers' union in the country, contact the office of the General Secretary on 078 051 2577, alternatively you can visit our website www.eusaunion.co.za / Become A Member

Once again, we wish all EUSA members a happy and a prosperous 2023!
